## DETAILED ACTION

### *Information Disclosure Statement*

1. The Examiner has considered the information disclosure statement (IDS) submitted on 4/23/04.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Burstein et al. (6,031,361).

Burstein et al. disclose a voltage regulation using an estimated current in Figs. 1-3. In Fig. 1A a switch controller (18), the switch controller to receive a first control signal (44e or 44f or 44h) and responsively generate a drive signal (44 a' and 44b') operable to enable a power switch (30 and 32) and to receive a second control signal (44e or 44f or 44h) and responsively generate the drive signal operable to disable the power switch (30 and 32) wherein the first control signal and the second control signal are representative of a PWM drive signal and forming the switch controller to generate a control output responsively to the first control signal and the second control signal. See col. 4, line 21 to col. 7, line 36.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
